

# MOBI-MIX - Project Overview

---

*Iris Ruysch – City of Rotterdam*

*Solutions+ MOBI-MIX Workshop*

*May 2022*

# MOBI-MIX key info

---

- Start date: **02/03/2020**
- End date: **30/09/2022** (potential extension by 6months)
- Project budget: **3 141 763 €**
- ERDF Amount: **1 885 058 €**
- Lead Partner: **City of Rotterdam**

# Objectives & consortium

Overall objectives: help cities **decarbonise road transport**, focusing on car-related emissions:

- Facilitate the private sector to more **effectively implement Shared-Mobility and MaaS solutions**
- **Reduce CO2 emissions and avoid/replace fossil-fuelled car trips** with sustainable shared mobility options

Consortium composition:

- 5 Cities: Rotterdam, Antwerp, Norfolk, Mechelen, Valenciennes
- 2 knowledge partners: Ghent University & Gustave Eiffel University
- Partners: POLIS, CoMoUK, Transalley Tech Park, and Cambridge Cleantech

# Pilot Overview: Antwerp

*B2B MaaS Pilots*

# Antwerp: B2B MaaS solutions

---

Focus: smart solutions for work-related travel, tailor-made for companies in search of a sustainable corporate mobility model

Three different operators developed different B2B MaaS pilots:

1. **Olympus4Antwerp**: MaaS app, Management Portal for employers & simplification of administration
2. **Skipr**: Skipr MaaS app, Skipr debit card and web platform for employers
3. **CAR(r)educer Antwerp**: a combination of services to reduce car use
  - Commuty: Management of parking space
  - Whim: MaaS operator where travel budget can be spent
  - Vaigo: connection with payroll administration

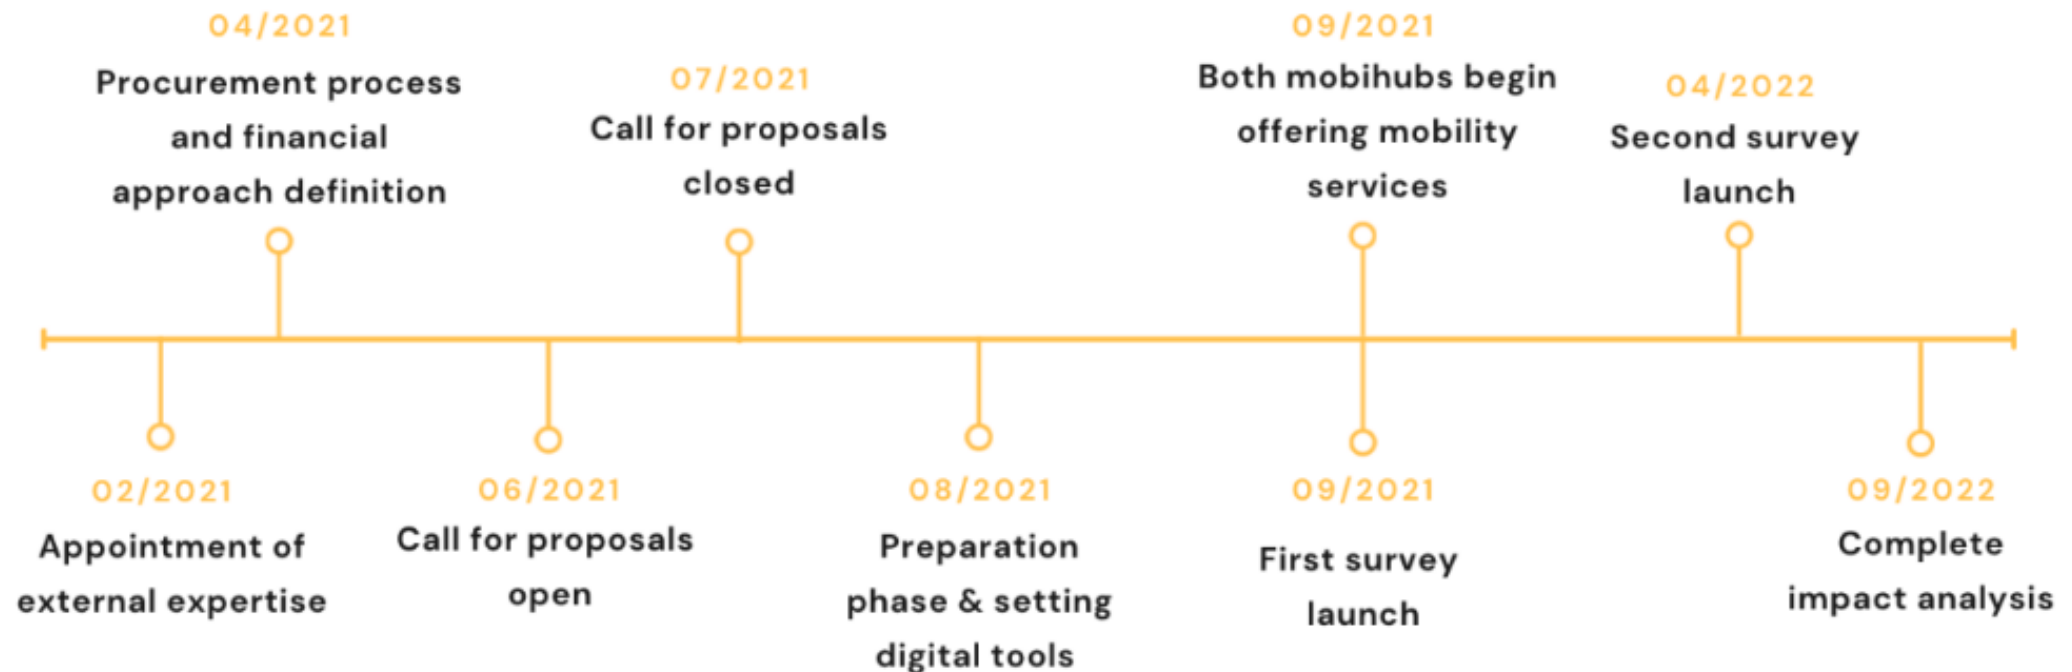

Project Less Cars

COMMUTY

# Antwerp: Timeline

- All MaaS Projects started in November 2020 and last for 18 months

# Pilot Overview: Mechelen

*Shared E-Cargobikes & free access to shared mobility*

# Mechelen: Shared E-CB & free access to mobility

---

## 1. Shared e-cargobikes - Cargoroo:

- Affordable station-based shared bikes
- Extension of a pending collaboration from 2 to 9 e-cargobikes.

## 2. Sharing neighborhoods:

- An offering of free access to public and shared transport modes for 26 people
- Challenge participants to leave their private cars aside for 60 days

# Mechelen: Timeline

# Pilot Overview: Norfolk

*E-Scooters, Training & Mobihubs*

**Norfolk**  
County Council

2 Seas Mers Zeeën  
**MOBI-MIX**  
European Regional Development Fund

# Norfolk: E-Scooters, Training & Mobihubs

---

## 1. E-Scooters and training:

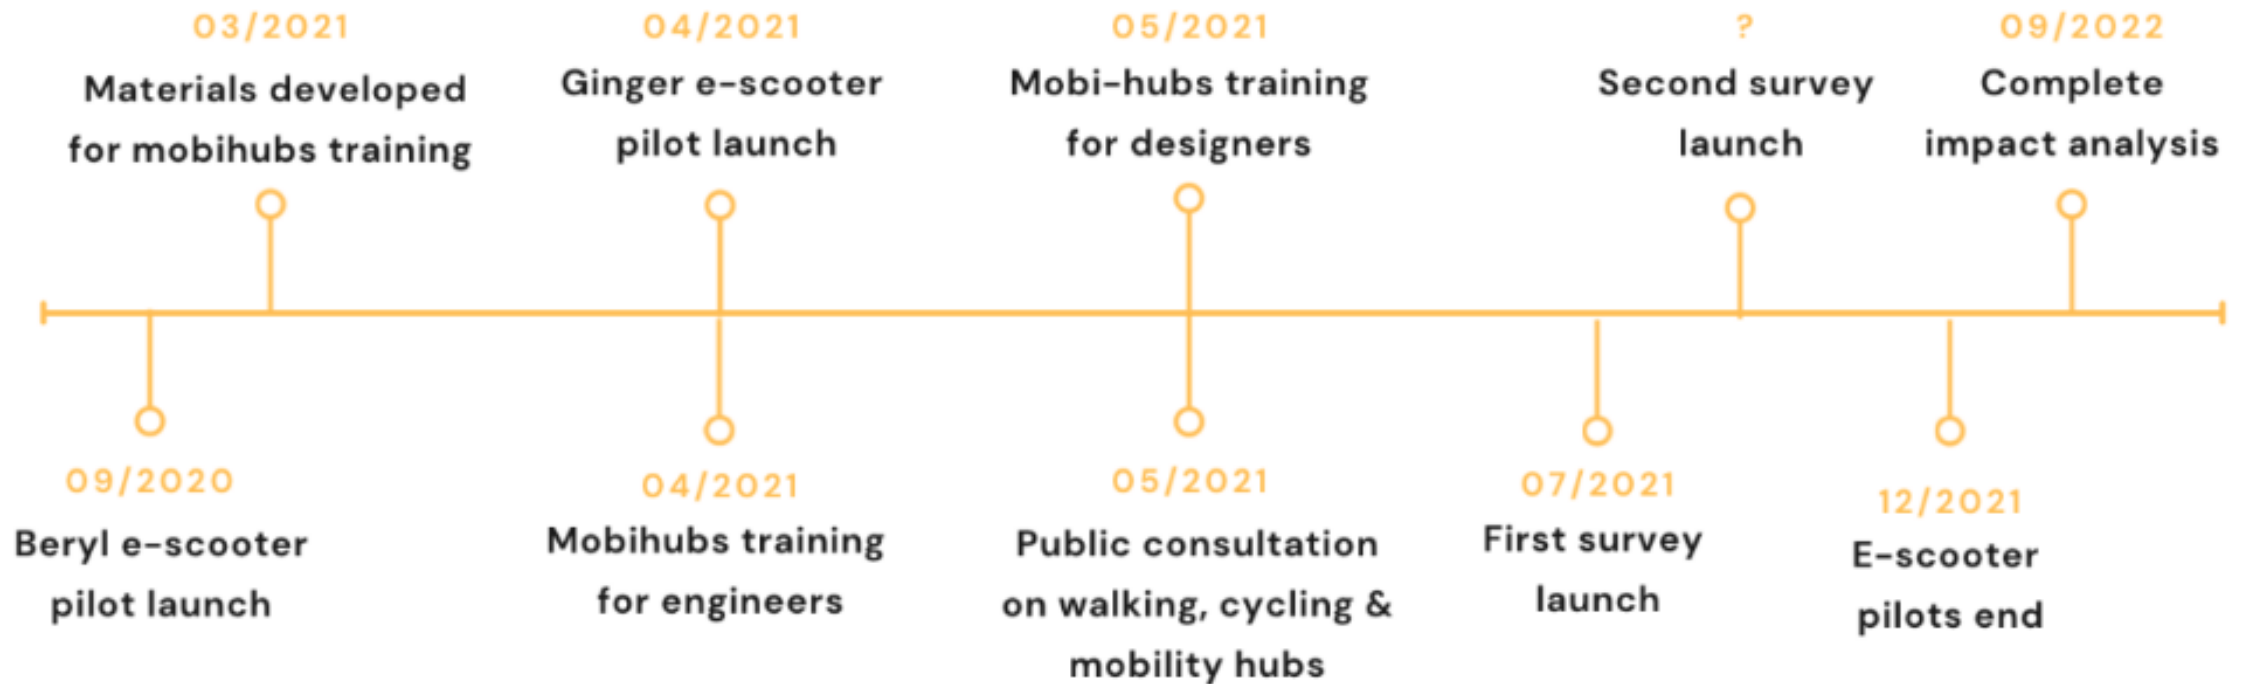

- Looking to support a ‘green restart’ of local travel, Norfolk County Council launched **two shared e-scooter pilots**, one in Norwich and the second in Great Yarmouth.
- In addition, the city developed an e-scooter training in partnership with Bikeability Trust.

## 2. Community-designed Mobihubs:

- Public engagement through consultation on the walking and cycling strategy
- Partnership with Healthy Streets, experts of people-focused design, to train key personnel in the local authority for the design of the mobihubs

# Norfolk: Timeline

# Pilot Overview: Rotterdam

*Free-floating, Station-based and Cooperative Carsharing*

# Rotterdam: Free-floating, Station-based and Cooperative car-sharing

**3 models of carsharing** were proposed to understand which one is most likely to **reduce the number of private cars** and **improve air quality**

## 1. Free-floating model:

- Deployment of 150 Electric Vehicles (out of the 600 aimed for due to global chip shortage)

## 2. Station-based model:

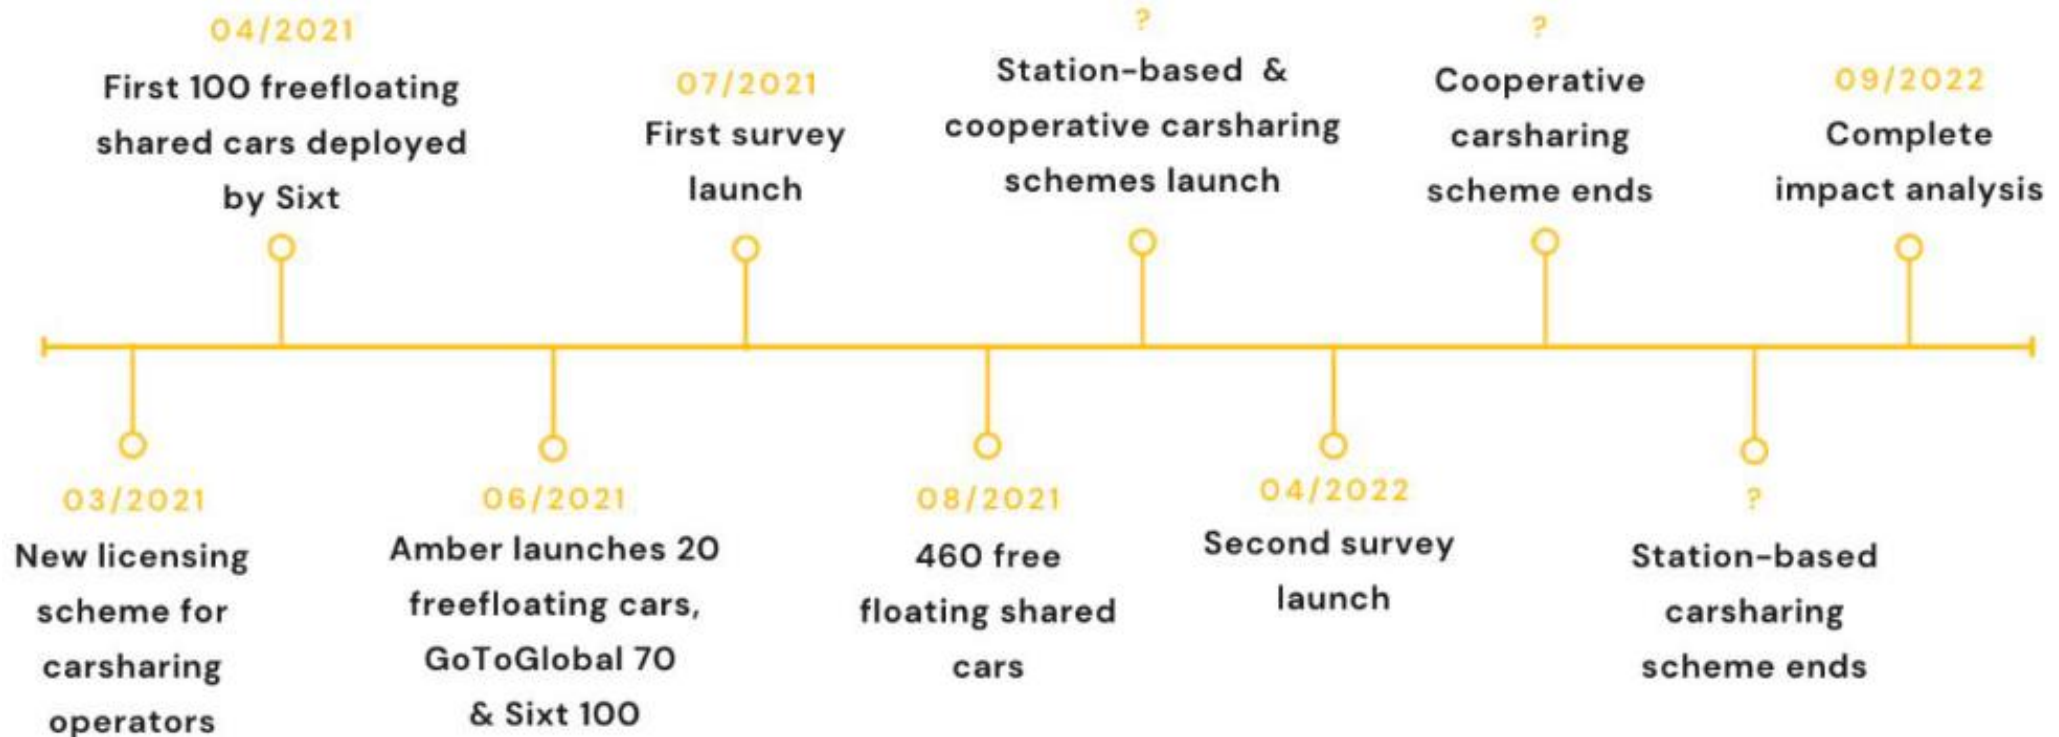

- Around 10 shared cars (out of 20 planned)

## 3. Neighborhood-based cooperative model:

- Small-scale cooperative model, but very few users interested (7-8/500-1000)
- Unsuccessful deployment due to a mix of hurdles (COVID, lack of 'common aim' in a neighbourhood chosen by city, lack of capacity for the provider to sustain stakeholder engagement)

# Rotterdam: Free-floating, station-based and cooperative car-sharing

# Pilot Overview: Valenciennes

*Mobihubs*

# Valenciennes: Mobility hubs

Within MOBIMIX, Valenciennes Métropole is implementing **two mobility hubs** to **improve access to sustainable and shared mobility** and provide users with:

- Easy access to public transport,
- Shared mobility options: bikes, e-scooters, cars, carpoolings
- A range of services to improve the mobility offer and user experience
- A range of other extra services such as restaurant/café/snack, lockers, etc.

Illustration of the target service offer of the mobility hubs

2. Carsharing
3. Mobility Hubs (upcoming)
4. (tbd) How to use shared mobility data for policy making

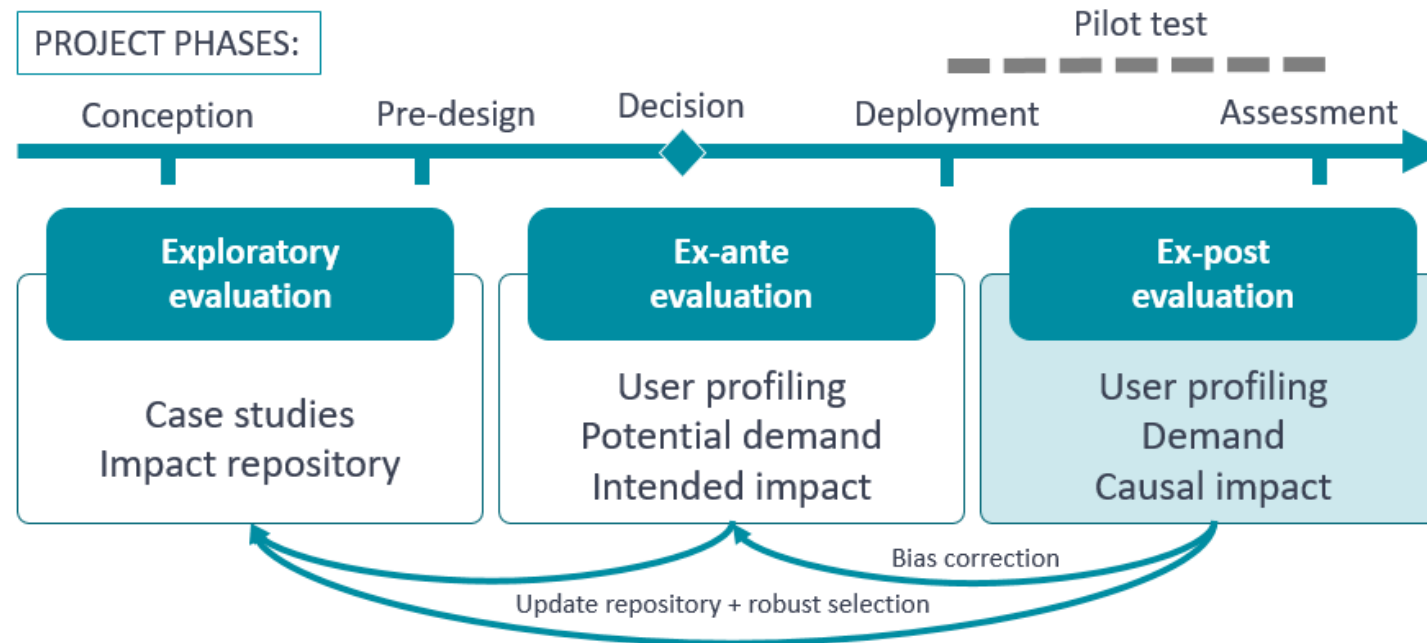

# MODE framework for impact assessment of mobility decisions

A step-wise approach to shared mobility impact assessment:

## MObility DEcisions framework (MODE)

How can we help cities along the pilot implementation decision process?

# Project achievements: Smart Mobility Guide

Aiming an **improvement of collaborations between mobility operators and public authorities**, a smart mobility **guide** was developed, providing insights on strategy, procurement, and partnerships.

# THANK YOU!
